Windows Explorer Integration

PowerClick Download With Full Crack is a small free utility that provides you with fast access to all commonly used power management features available in Windows. Those are shutdown, restart, standby, hibernate, log off and station lock (Windows 2000/XP only).

Application size is only about 20 KB compared to some similar utilites which can be even 1 MB or more. No

installation is needed, just extract all files from the archive into the desired directory and run the PowerClick.exe. All program functions are available from the menu conveniently hidden under the icon located next to the system clock.
